

# Technical Information

## Evidence of **Validity**

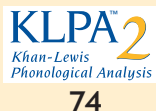

Sensitivity & Specificity			
Deviation From Mean	Standard Score Cut	Sensitivity	Specificity
-1 SD	85	.93	.83
-1.5 SD	77	.83	.91
-2 SD	70	.67	.98

## Clinical Study

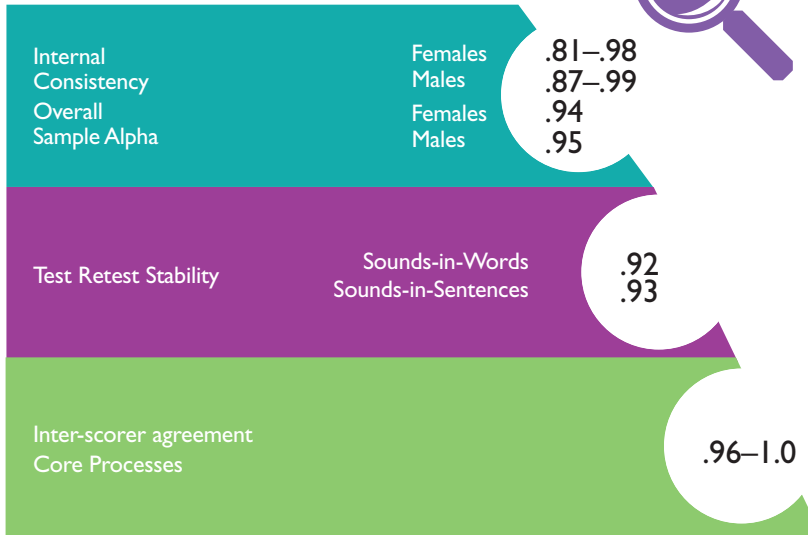

Speech Sound Disorder	Differences significant at
Mean Standard Score Differences between Speech Sound Disorder group and Nonclinical Sample	<b>&lt;.01</b>
Ages 4:0-8:11 39.61	

## Test **Correlation**

.74

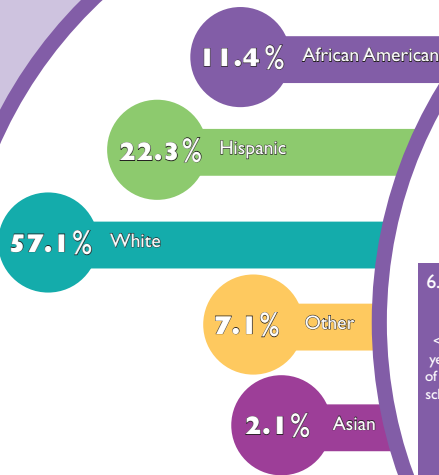

## Evidence of **Reliability**

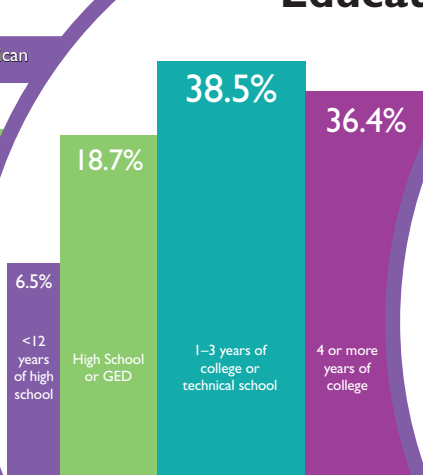

## Demographic Information

1,500 examinees ages 5-21 in the normative sample

### Race/Ethnicity

### Parent Education

### Region

**39** of 50 states
