55	50	45	40
50	45	40	35
45	40	35	30
40	35	30	25
35	30	25	20
30	25	20	15
25	20	15	10
20	15	10	5
15	10	5	0
10	5	0	-5

Vertical bar represents the Standard Error of Measurement.

Subtest	Score	SEM	Subtest	Score	SEM
Matrices (MA)	80	3.48	Object Assembly (OA)	69	4.20
Block Design (BD)	68	4	Picture Recognition (PR)	73	4.47

Sample from Parent Report

Easy to use and saves you time

Reduce your scoring time up to 50 percent. Enter subtest level raw scores and generate data that includes:

- Raw to *T-score* conversions with percentile ranks and confidence intervals
- *T-score* profile
- Subtest strengths and needs
- Optional analysis data for Spatial Span subtest
- Access to information at your fingertips, anytime, anywhere
- Data is stored on your computer and easily retrieved
- Flexibility in reporting and editing
- Parent Reports available in English, Spanish, and French
- Normative data for both U.S. and Canadian populations
- Exportable score reports to a text document for personalization and editing

WNV™

WECHSLER NONVERBAL SCALE OF ABILITY

A Nonverbal Measure of Ability
for Anyone, Regardless of the Language Spoken

*-especially designed
for culturally and linguistically diverse groups*

Pictorial Directions

Innovative

Easy and Effective Administration

- No need to pantomime instructions
- Native language of the examinee is irrelevant to performance
 - Flexible standard administration allows help when appropriate
 - Ideal for Spanish-dominant examinees when no Spanish-speaking clinician or translator is available

Ages

4:0-21:11 years

Scores

Full scale score, norm-referenced, composite score, separate subtest scores

Administration

4-subtest battery:
45 minutes

2-subtest battery:
15-20 minutes

Qualification Level

C

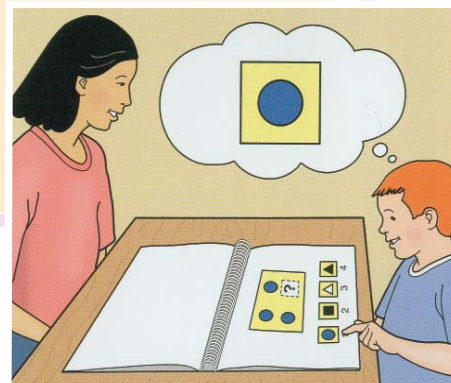

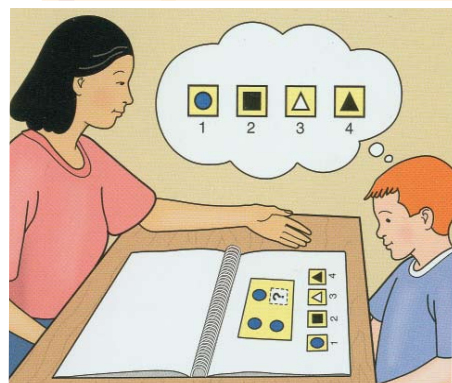

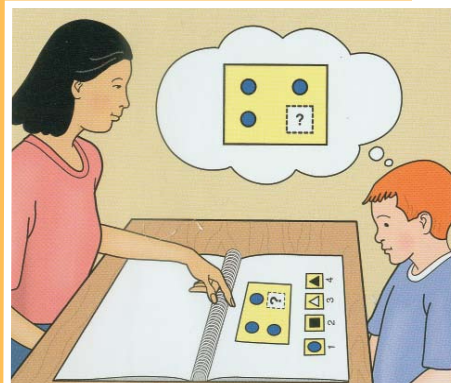

“What excites me the most about the WNV are the pictorial directions -

illustrations that actually show the examinee what to do.

We also include short, verbal statements in several languages to be used when needed. This innovative and flexible approach to test administration allows assessment of individuals who speak any language - as well as those who have language impairments or disorders.”

Jack A. Naglieri, Ph.D.

Co-Author
Wechsler Non-Verbal

Example of administering a subtest using pictorial directions.

Diverse

Linguistically

No Need to Use Multiple Tests

- Ideal for use in schools with individuals from multiple language backgrounds
- Meets current IDEA requirements
- Supplemental directions in several languages
- No need for adapted administration for use in different countries or with individuals from different countries

Flexible

Administration

Choice of Full Battery or Brief Version

Full battery subtests based on age group include:

Two-Subtest Battery:

Ages 4-7

- Matrices
- Recognition

Ages 8-21

- Matrices
- Spatial Span

Four-Subtest Battery:

Ages 4-7

- Matrices
- Coding
- Object Assembly
- Recognition

Ages 8-21

- Matrices
- Coding
- Spatial Span
- Picture Arrangement

“The inclusion of instruction in five languages and the innovative pictorial directions are brilliant and move the field of nonverbal assessment many paces forward.”

Alan S. Kaufman, Ph.D.
