# Putting UNIVERSAL in Universal Screening

## **BASC™-3 Behavioral and Emotional Screening System Available on Review360®!**

Children with behavioral and emotional challenges can face a seemingly uphill battle in and out of the classroom. Their behavioral issues can impede their educational progress, while emotional issues impact their relationships with their peers and family. Left untreated, these difficulties can manifest themselves into a host of long-term problems, both in school and at home.

One out of every five children have mental health issues varying from ADHD, aggression, defiance, anti-social behaviors, anxiety, and depression. However, only 1% of those students are properly identified. Having a comprehensive system in place to help screen, assess, and support children and adolescents with behavioral and emotional challenges can be critical to their social and academic success.

# BASC-3 BESS on Review360

Review360 offers several Universal Screener options featuring the BASC-3 Behavioral and Emotional Screening System.

## What is the BASC-3 BESS?

The BASC-3 BESS is an assessment that can be used in school or clinical settings to provide a quick snapshot of a child's behavioral and emotional functioning, quickly identifying children and adolescents aged 3 to 18 years who might be in need of additional support. It works cooperatively with the assessment, intervention, and progress monitoring facets of a comprehensive behavior management program such as Review360.

### Some of the benefits of Review360:

- Universal screening
- Information on causes of certain behaviors
- Variety of scalable behavior intervention programs
- Functional behavioral assessments
- Behavior data composed into shareable reports
- Scales to guide and support teachers
- Expert coaching and professional development for teachers
- Can be administered on any computer or mobile device

Review360 aggregates and analyzes the data collected and presents the information in a comprehensive, useful format:

- Individual student scores with risk-level indicators
- Student score comparisons
- Screener status reports
- Reports by grade, gender, ethnicity, class, and date

With unlimited screening and ease of use, Review360 boosts the power of the BASC-3 BESS while making the process manageable, accessible, and affordable, increasing your students' chances of success!
