
Director

Manufacturing Industry

Name: John Sample

Date of Testing: 12/03/2010

Organization: Pearson Sample Corporation

Introduction

This report provides information about a candidate's potential fit for the position of director within the manufacturing industry. Directors who work in the manufacturing industry typically perform the following activities:

- Provide overall leadership for manufacturing operations and support functions
- Lead strategic vendor/contractor selection and commercial negotiations
- Plan, communicate, and manage the manufacturing budget
- Develop strategies and investment goals to achieve competitive advantage and product leadership while maximizing efficiency and minimizing expenses
- Find innovative and cost-effective ways to improve product quality
- Implement effective plans to ensure adherence to safety, quality, and government standards and regulations

This report includes information on the candidate's potential to perform these types of activities, based on an assessment of the candidate in two key areas:

- Critical Thinking - decision making, sound reasoning, and logic
- Work Style Compatibility - the match between work behaviors and job requirements

Research by the Department of Labor has found that critical thinking ability and the work styles measured in this assessment are important for successful performance as a supervisor. Directors with a high level of critical thinking ability are able to accurately evaluate situations and make logical decisions when faced with complex or ambiguous information. Similarly, directors with certain work styles (e.g., leadership orientation, adaptability, attention to detail) are able to meet the demands and expectations of the role.

For more information on use of this report for employee selection, please consult the [User's Guide for Occupational Solution: Director within the Manufacturing Industry](#).

Overall Fit

Score Interpretation

The overall fit score is based on a combination of critical thinking ability and work styles that are critical for a director within the manufacturing industry.

This candidate's overall fit score is in the average (yellow) range. Based on this score, it is likely that the candidate is a moderate fit for a director position within the manufacturing industry.

Critical Thinking

Is likely to struggle with tasks that require critical thinking skills

Is likely to excel in tasks that require critical thinking skills

Score Interpretation

This candidate's score was higher than or equal to 59% of the scores in a sample group of directors within the manufacturing industry. This individual is likely to demonstrate the level of critical thinking necessary for effective analysis and decision making in most situations. Specifically, relative to other directors within the manufacturing industry, this individual is likely to:

- Define at least the basic elements of most problems and situations clearly and objectively
- Recognize the lack of salient or obvious information needed for effective decision making or problem solving
- Typically apply sound logic and reasoning when analyzing information
- Draw accurate conclusions from information in most situations and under most circumstances
- Develop rational arguments to support ideas

Critical Thinking Subscales

	Score	% Correct
Inference	7	100
Recognition of Assumptions	6	75
Deduction	8	89
Interpretation	6	86
Evaluation of Arguments	5	56

The graph above provides a profile of relative strengths and weaknesses on the subscales comprising the critical thinking score. However, because each subscale contains fewer items, the subscale scores tend to be less reliable than the overall score. It is the overall critical thinking score that yields a consistent or reliable measure of critical thinking ability.

Work Style Compatibility

Low compatibility with the work styles required for success as a director within the manufacturing industry

High compatibility with the work styles required for success as a director within the manufacturing industry

Score Interpretation

This candidate obtained a Work Style Compatibility percentile score of 52. This score indicates that the candidate is a moderate fit based on the work styles required for successful performance as a director within the manufacturing industry.

Work Styles

Achievement Orientation

Achievement/Effort

Is unlikely to set challenging work goals and may exert a low level of effort toward achievement of goals

Is likely to establish, maintain, and exert extensive effort toward achievement of challenging work goals

Persistence

May not persist when faced with difficulties or obstacles, or when success seems unlikely

Is likely to be highly persistent on the job, even when faced with difficulties or obstacles, or when success seems unlikely

Initiative

Is likely to have little interest in volunteering for or taking on new work responsibilities or challenges

Enjoys taking on new or additional work responsibilities and challenges

Social Influence

Leadership Orientation

Is likely to have little interest in taking charge or directing and leading others; may be hesitant to offer opinions

Is prone to taking charge, leading others, and offering opinions; very high scores may push others too firmly

Interpersonal Orientation

Cooperation

May not be consistently pleasant, good-natured, or cooperative.

Is likely to consistently demonstrate a pleasant, good-natured, and cooperative attitude with others on the job.

Concern for Others

May miss opportunities to demonstrate sensitivity, caring, and support for others on the job.

Is highly sensitive to the needs and feelings of others and highly supportive; very high scores may hesitate to deliver tough messages.

Social Orientation

Is likely to prefer working alone or in small groups and to be indifferent as to whether work colleagues are personal friends.

Enjoys working with others on the job and having work colleagues as friends; very high scores may be uncomfortable working alone.

Independence

Independence

Is likely to have to rely on others to define tasks and ways of doing things; may not deal effectively with ambiguity; may prefer working under close supervision

Prefers freedom to guide self with little or no supervision and develop own way of doing things; deals effectively with ambiguity; very high scores may be uncomfortable with supervision

Conscientiousness

Dependability

May be inconsistent or casual about fulfilling job and work obligations

Is likely to consistently fulfill job and work obligations

Attention to Detail

Is likely to prefer tasks and issues that require a more global focus to those that require high attention to detail

Enjoys and is likely to excel at tasks that require a strong focus on detail and a need for thoroughness

Practical Intelligence

Innovation

Is likely to be more conventional than creative in addressing work-related issues or problems

Enjoys producing new or creative ideas for addressing work-related issues or problems

Analytical Thinking

May not enjoy analyzing complex issues in depth and may miss opportunities to use logic to resolve work-related issues or problems

Enjoys analyzing complex issues in depth and using logic to resolve work-related issues and problems

Adjustment

Self-Control

May not maintain composure as consistently as peers; may be prone toward open displays of emotion

Is likely to maintain composure and control anger, even in very difficult situations

Stress Tolerance

May have little tolerance for criticism or for stress imposed by other people or circumstances

Is likely to accept criticism well and remain calm, even when facing high pressure or stress imposed by other people or circumstances

Adaptability/Flexibility

Is unlikely to enjoy or look forward to change or variety in the workplace

Enjoys and looks forward to change and variety in the workplace

Unlikely Virtues

Unlikely Virtues

Acknowledged self-limitations in responses; not concerned about making a positive impression

Minimized self-limitations in responses; appears concerned about making a positive impression

Note. The Work Style scores should be interpreted with caution if the Unlikely Virtues percentile score is higher than or equal to 95.
